

Tamworth Business Chamber 2011

# Quality BUSINESS Awards

Presented by: **BAXTER OHARA**

## Winners

**EXCITED WINNERS:** Challenge Recycling employees were ecstatic to receive their Quality Business Award trophy on Monday morning.

# Gong a thrill for Challenge team

CHALLENGE Recycling employees were thrilled with the news that Challenge Recycling had won an award at the annual Tamworth Business Chamber Quality Business Awards on Friday night.

Challenge Recycling took out the Environmental Commitment award for the Material Recovery Facilities (MRF) eco-friendly methods and waste reduction practices.

It is averaged that each year the MRF reduces the region's carbon footprint by removing more than 7250 tonnes of material from the

region's waste stream annually and sending it to processors for recycling into new product. By diverting this material from the region's waste stream, the MRF has saved 19,951 cubic metres of space at the landfill.

The environmental benefits are even greater; the greenhouse benefits of recycling this amount of waste equates to permanently removing 770 cars from the region's roads. This is an important way to reduce carbon emissions in the environment. Finally, the water savings produced by recycling, rather than

virgin product manufacturing, equate to the water in 2332 average-size backyard pools.

Challenge Disability Services recently invested \$1.5 million in new technology to improve the plant's capacity to handle increasing volumes of recycling. Challenge Recycling is committed to educating the public on the benefits of recycling and protecting our environment and has commenced a television advertising campaign to raise public awareness of what should and should not be placed in kerbside recycling wheelie bins.
